DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- AK*
10/1/04
- I. Claims 1-21, 25-26, 31, 33, 35, 37, 39-53, drawn to "A **nonvolatile** semiconductor memory device in which one block for writing/erasing a page unit", classified in class **365**, subclass **185.12**.
 - II. Claims 22-24, ~~27~~30, 32, 34, 36 and 38, drawn to "A **memory system** operate in page addressing", classified in class **365**, subclass **238.5**.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I is for nonvolatile memory while inventions of Group II is for volatile memory.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
